REMARKS

As discussed in the accompanying Preliminary Amendment, Applicants respectfully note that Claims 11 through 124 of the subject application have been copied in modified form from Claims 1 through 14, 16, 17, and 22 through 40 of U.S. Patent No. 6,018,423 (Takahashi '423), which is a division of U.S. Patent No. 5,875,056 (Takahashi '056), which is a continuation of U.S. Patent No. 5,701,202 (Takahashi '202).

Applicants respectfully note that U.S. Patent No. 5,701,202 (Takahashi '202) discloses and claims, inter alia, an ocular optical system having a first refracting/internally reflecting surface, a second reflecting surface, and a third refracting surface.

Applicants also respectfully note that U.S. Patent No. 5,768,024 (Takahashi '024) discloses and claims, inter alia, an ocular optical system having first, second, and third surfaces, wherein the second surface is a reflecting surface that reflects light rays in the ocular optical system, the second surface having such a surface

configuration that a surface configuration in a plane (YZ-plane) containing light rays turned back by the reflecting surface is different from a surface configuration in a XZ-plane perpendicular to the YZ plane.

Applicants respectfully submit, however, that none of Takahashi '056, '202, '024, and '423 qualifies as prior art under the meaning of 35 U.S.C. §§ 102 and 103.

It will be appreciated that the above-listed Application Nos. 09/333,998 and 09/511,243 are, like the subject application, divisional applications of the parent of the subject application; accordingly, the Examiner's attention is respectfully directed to the claims thereof.

Lastly, Applicants respectfully submit that Japanese Laid-Open Patent Application No. 4-242630 corresponds to Japanese Patent Application No. 3-11492, which is referenced at page 27, lines 12 and 13 of the specification. It will be appreciated that the Preliminary Amendment filed concurrently herewith, corrected the citation thereof. Applicants respectfully submit that U.S. Patent No. 5,598,248 is a U.S. counterpart of the Japanese application. With respect to Japanese Laid-Open Patent Application No. 4-343313, Applicants respectfully submit that U.S. Patent No. 5,671,062 is a U.S. counterpart.

CONCLUSION

It is respectfully requested that the above information be considered by the Examiner and that a copy of the enclosed Form PTO-1449 be returned indicating that such information has been considered.
